

Premier League Match Predictor

Overview

This project implements a Premier League match outcome predictor using Multinomial Logistic Regression in PyTorch.

The model predicts:

- Home Win
- Draw
- Away Win

Dataset

Training data:

- Premier League matches (2000–2024)

Testing data:

- Premier League 2025 season

Features

- Home Team
- Away Team
- One-hot encoding for team representation

Model

- Framework: PyTorch
- Loss: CrossEntropyLoss
- Optimizer: Adam

Results

Test Accuracy: 48.16%

Future Improvements

- Team embeddings
- Recent form
- Head-to-head statistics
- Average goals scored/conceded
- League position

Author

Created as a machine learning project exploring football match prediction using historical Premier League data.
